secondary effect of sulfur	2-11-12	propeller blades	3-15	selection of powder	4-9
sulfur concentration	2-9-10	High-speed steels		sintering	4-10-11
toroid core analysis	2-10	hardening	3-9-10	tolerances	4-15-16
Electrodeposition		use of molten salt baths	3-9-10	Precision forged gears	
of Co	3-44-46	High strength steels		comparison with cut gears	4-21-22
of Co alloys	3-44-45, 46-48	metallurgy	2-12	fatigue tests	4-21
Electron beam evaporation		properties	2-2-6	forging	4-20-21
making Ni alloy foils	1-1-5	Hot consolidation		impact tests	4-21
making stainless steel foils	1-1-5	extrusion	1-27-28	Predictive testing	2-32-42
making Ti alloy foils	1-1-5	hot isostatic pressing	1-28	uses	2-35-36
making Zr foils	1-1-5	hot pressing	1-27	Press forming	
Electron microscopy		in powder metallurgy	1-27-29	analysis of variance of strain severity	3-56
in Al	2-48-50	Hot forging		effect of lubricants	3-54-55
in prevention of solder splatter	2-52-55	in powder metallurgy	1-24-27	effect of material properties	3-55-56
Electroplating		Hot forming		laboratory study	3-52-56
improving joint strength	1-10-11	in P/M gears	4-11-13	producing parts	3-56
joining of Al alloys to stainless steels	1-7-8	Hot isostatic pressing		shape analysis	3-56-58
joining of stainless steels to stainless steels	1-8-10	in powder metallurgy	1-28	strain measurements	3-54
joining of steels to U alloys	1-10	Hot pressing		study of materials	3-50-52
Engine tests		in powder metallurgy	1-27	Pressure-vessel steels	
of austenitic steels	3-26-27	Hot repressing		brittle fracture	3-38-39
of ferritic steels	3-26-27	in P/M gears	4-13	bursting strength	3-37-38
Environment effect on pressure-vessel steels	3-40	Impact		environmental effects	3-40
Exfoliation of Al P/M alloys	1-59, 61-62	of gears	4-21	fabrication	3-36-37
Extrusion		of maraging steels	2-62-63	fatigue failure	3-39-40
in powder metallurgy	1-27-28	Information storage and retrieval systems		Progress in failure analysis	2-43-46; 47-50; 50-54; 55-61
of Ni alloy tubing	4-41-43	KWIC system applied to materials selection	4-38-41	Progress in gearmaking	4-1-8; 8-15; 15-19; 20-22
Fabrication		Iron bars		Progress in modern technologies	1-1-5; 6-12; 12-18; 19-24; 24-29
of Al P/M alloys	1-52-54	preparation of pure bars by zone refining	1-19-24	Propeller blades	
of pressure-vessel steels	3-36-37	Keyword in context systems applied to material selections	4-38-41	failure	3-15
Failure		Load ratings in P/M gears	4-16-18	Properties	
of aircraft components	3-10-15; 4-23-29	Lubricants		of Co	3-45-46
of steel drive cables	2-43-47	effect on forming	3-54-55	of Co alloys	3-46-48
Fatigue		Maraging steels, specific types		of high strength steels	2-2-6
of Al P/M alloys	1-59-63	Maraging steels, specific types 18% Ni		Quality control	
of gears	4-21	impact-fatigue	2-62-64	of P/M gears	4-18-19
of pressure-vessel steels	3-39-40	wear	2-63-64	Quench sensitivity of Al alloy forgings	4-51
of Ti alloys	3-59-61	Material procurement specifications correlated with fracture mechanics standards	2-16-22	Reheaters	
Fatigue crack growth		Materials selection		fuel-ash corrosion of Ni alloys	1-44-51
design	3-17-20	KWIC system	4-38-41	Roll forming of splines	4-3-4
material selection	3-17-20	Metallurgy of high strength steels	2-1-2	Rupture testing	3-1-2
properties	3-17-20	Microprobe fracture analysis of steel plates	3-3-8	Scanning electron microscope fractography	
Fatigue crack initiation		Microstructure		in steel drive cables	2-43-46
design	3-20-21	in carburizing steels	1-32-39	Service failures	
material selection	3-20-21	of Co	3-45-46	mutual indentation hardness	2-55-61
properties	3-20-21	of Co alloys	3-46-48	Shape analysis in press forming	3-56-58
Ferritic steels		Molten salt baths		Sheet metals	
corrosion	3-23-35	use in hardening of high-speed steels	3-9-10	anisotropy	2-28
descaled weight loss	3-27-28	Mutual indentation hardness in service		biaxial stress tests	2-24-27, 29-30
effect of composition	3-32-33	failures	2-55-61	ductility	2-28-29
penetration	3-28-30	Nickel alloy foils, specific types		uniaxial stress tests	2-22-24
visual inspection	3-30-32	Inconel 600		Sintering in P/M gears	4-10-11
weight change during cyclic oxidation tests	3-24-26	electron beam evaporation	1-1-5	Solder splatter	
weight change during engine tests	3-26-27	Nickel alloy tubing		cause	2-51-52
Flashless-confined die upsetting		extruding	4-41-43	use of electron microscopy	2-52-55
in P/M gears	4-13-15	Nickel alloys, specific types		Splines manufactured by roll forming	4-3-4
Forging of gears	4-20-21	Inconel 671/1800		Spring legs failure	4-23
Formability of Zn superplastic alloys	4-58-59	fuel-ash corrosion	1-44-51	Stainless steel foils	
Forming in P/M gears	4-8-9	in superheater and reheater service	1-44, 50-51	electron beam evaporation	1-1-5
Fracture analysis		Inconel alloy MA753		Stainless steels, specific types	
of steel plate	3-3-8	creep	2-12-16	AM363	
use of microprobe	3-3-8	Nickel superalloy powders, specific types		joining by electroplating to Al alloys	1-7-8
Fracture mechanics standards correlated with material property requirements	2-16-22	IN-100		joining by electroplating to stainless steels	1-8-10
Fracture toughness of Al alloy forgings	4-51	development of modified Cb-IN-100	4-47-49	Type 430	
Fretting failure in aircraft components	4-24-26	Notching wear in carburizing steels	1-35-39	drawability	1-40-43
Fuel-ash corrosion		Penetration		Starter pinion gears manufactured by cold forming	4-2
in superheaters and reheaters	1-44-51	of austenitic steels	3-28-30	Steel drive cables	
of Ni alloys	1-44-51	of ferritic steels	3-28-30	failure	2-43-47
Gears		Powder metallurgy		use of SEM fractography	2-43-46
comparison of cut and forged gears	4-21-22	hot consolidation	1-27-29	Steel plates, specific types	
fatigue tests	4-21	hot forging	1-24-27	2024-T851	
impact tests	4-21	Powder metallurgy gears		fracture analysis	3-3-8
precision gear forging	4-20-21	consolidation	4-10		
using powder metals	4-8-15	flashless-confined die upsetting	4-13-15		
Hardening of high-speed steels	3-9-10	hot forming	4-11-13		
Heat damage in Al alloys	2-4-8	hot repressing	4-13		
Helicopter components		load ratings	4-16-18		
crankshafts	3-13-15	powder forming	4-8-9		
failure	3-10-15	perform fabrication	4-9-10		
		quality control	4-18-19
